

Packaging Solutions For **Automotive Spare Parts**

Europe Packaging provides a complete range of packaging solutions for automotive spare parts industry, serving OEM, OES and IAM customers.

With over 30 years of experience, we manufacture folding cartons and offset-laminated corrugated packaging boxes for demanding industrial applications. Our offset-laminated corrugated boxes are ideal for automotive spare parts, combining high mechanical strength and product protection with high resolution offset printing for clear identification, branding and shelf impact.

From brake discs to engine components, we help ensure your products are delivered safely, efficiently and professionally.

Why Europe Packaging

- Tailor-made packaging engineered for automotive parts
- Compatible with manual and high-speed automated packaging lines
- High-strength construction with excellent stacking performance
- Optional protective barrier coatings
- Premium print quality with advanced finishing
- User-friendly designs that reduce packaging time and costs
- Made from 100% recyclable and renewable materials

Let's Build Your Packaging Solutions
