

## Packaging Solutions For **Inflight Service**

Europe Packaging offers folding carton solutions for aviation inflight meals and snacks, designed to support efficient service and enhance passenger experience.

Our portfolio includes snack sleeves and complete meal boxes made from responsibly sourced paperboard, combining lightweight performance with strength and hygiene. Engineered structures protect food integrity, while high-quality printing ensures clear branding and a premium presentation aligned with modern airline expectations.

Designed for ease of handling and use, our packaging simplifies onboard service and disposal while combining functionality, sustainability, and visual appeal to create a positive passenger experience.

### Why Europe Packaging

- Custom-designed folding carton structures tailored to inflight meals, snack portions, and service formats
- Lightweight yet robust paperboard constructions
- Hygienic, food-safe materials and coatings compliant with aviation
- Precision die-cut designs for sleeves and box formats
- High-quality offset printing with protective finishes
- Consumer-friendly opening and disposal features
- Sustainably sourced, recyclable folding carton materials

#### Let's Build Your Packaging Solutions

Partner with us to develop inflight meal and snack packaging that combines hygiene, sustainability, and a refined passenger experience.
